Oracle Forms → Java. Fully Automated.

Data Integrity

Avoid security breaches in your Oracle Forms systems. In security, modern Java systems outperform legacy.

Just Works

Our solution is designed to "just work" seamlessly, making the migration process as smooth as possible thanks to full automation.

Real ROI

Re_forms21 offers a compelling return on investment without involving your resources and minimizing migration costs.

Re_forms 21

Automated Code Refactoring

Revolutionize your software stack with our Re_forms21 platform and expert code refactoring services

Oracle Forms → Java. Fully Automated.

HOW IT WORKS

Seamless automated migration of your Oracle Forms & Reports System

We understand the critical importance of maintaining application continuity, and Re_forms21's migration process is designed with this in mind. The transition to Re_forms21 is an easy, automated and staged process, allowing you to migrate of Oracle Forms on the same database if needed assuring zero down time of the entire process.

Our solution offers an intuitive migration path for applications developed in Oracle Forms, reducing to almost zero the complexities associated with manual migrations.

STAGED MIGRATION

Re_forms21 facilitates a gradual, staged migration approach, ensuring a smooth and low-risk transition for your applications.

AUTO MIGRATION

Our solution offers an intuitive migration path for applications developed in Oracle Forms, reducing the complexities associated with manual migrations.

USER FRIENDLY

The transition process is user-friendly, making it easy for clients to migrate from Oracle Forms to the Java model without a steep learning curve.

> Re_forms 21 enables **easy, automated migration** of applications written in Oracle to Java.
